4. The following is an examiner's statement of reasons for allowance:

Claims 3; 5; and 7 and 8 are drawn to computing devices. The closest prior art, Rose, U.S. Patent No. 5,708,709 A, discloses similar computing devices. Rose neither teaches nor suggests a management module separate from the rendering application and interfaceable to any of a plurality of rendering applications wherein the management module returns first data including first information in an unencrypted format, enabling use of the first information by the rendering application. This composite limitation explicitly incorporated into independent claims 3, 5, and 7 render claims 3; 5; and 7 and 8 allowable.
